

UI Engineer

Position Summary

File & ServeXpress LLC is a premier provider of electronic filing and electronic service solutions for the legal industry. As a Software-as-a-Service company, our web experience is critical to our success. The UI Engineer will work with the rest of the Software Development Team to improve our products and services including creating new applications and functionality, upgrading existing applications, and collaborating with our DevOps staff to ensure our systems are reliable, accessible, and performant.

The right candidate will be highly-skilled technically, particularly in JavaScript and .NET, but also a self-motivated individual eager to innovate and invent.

Essential Job Functions

- Develop and maintain Single Page Applications (SPA) using Angular including automated testing and integration with REST API's.
- Propose User Experience options to provide application functionality.
- Participate in the Team's Agile development process including routine meetings such as standups, backlog grooming, story refinement, sprint reviews and demos.
- Decompose assigned development work into tasks and provide estimates for completing work.
- Work with the Team to establish standards and practices for development activities.
- Participate in code reviews and collaborate with other developers to design the necessary API's and integrations required for web applications.
- Identify and communicate risks to deliverables and the company in a timely manner.

Skills, Knowledge & Abilities

- Experience with Angular development (Angular 4.0 and later)
- Experience with developing CSS using SCSS and/or SASS including responsive CSS design principles.
- Experience with git source control, pull requests, and Scrum or Kanban agile processes.
- Ensure work products meet the expectation of the Team and conform to established standards and practices.
- Effectively manages and controls own tasks.
- Maintains a positive and enthusiastic attitude.

Job Requirements

- 4 + years of experience in software development with 2 + years of Angular or React development.
